

Q88.COM LLC.

NEWS RELEASE

Norwalk (Connecticut), February 11, 2008 --- Q88.com LLC. ("Q88") announced today the completion of a project to integrate their web site with the vetting system of Galp Energia ("GALP").

This integration allows ship owners to complete GALP's vetting questionnaire directly on Q88.com. The data is sent automatically into GALP vetting system, further improving the efficiency of the vetting process to the benefit of the ship owners and GALP alike.

Fritz Heidenreich, President of Q88, said, "Questionnaires are an integral part of the pre-fixture process, integrating with GALP is an added benefit for all the parties involved and will ensure that the vessel can be vetted in a timely manner."

The Q88 web site was launched in June 2001. There are currently 575 questionnaires available, which are being used by over 350 ship owners representing 4,500 vessels.

The www.Q88.com web site can be accessed for more information.
